U. S. PUBLIC HEALTH SERVICE

A TELEGRAPHIC CODE

FOR THE USE OF THE

UNITED STATES PUBLIC HEALTH SERVICE

PREPARED UNDER DIRECTION OF
. . THE SURGEON GENERAL . .

WASHINGTON
GOVERNMENT PRINTING OFFICE
1915

Copy No. .....338.....

Quarantine, Reedy Island, Del.

(Name of officer to whom this copy is charged.)

PREFACE.

This code has been prepared for the use of officers of the United States Public Health Service, not only to avoid publicity in connection with official communications, but also as a measure of economy. Any two of the code words, which are composed of five letters, may be joined and sent as one word of ten letters.

If a medical officer is familiar with the use of telegraphic codes in general, there should be little difficulty in understanding the general arrangement of this code.

No index is necessary for the reason that both code words and captions are alphabetically arranged throughout except that "Departments and officers of the Government," "Chronological," and "Days of the week" precede the general code in the order mentioned.

Every officer using this code is enjoined to keep it under lock and key and as a part of his personal effects.

This code should be read carefully from beginning to end, in order that a general knowledge may be obtained as to the contents and the possibilities for constructing dispatches in the most economical manner consistent with the proper understanding of the message on the part of the person receiving it. A medical officer should never send a message without first considering whether he would understand the message, if received by himself.
